Business Analyst / Consultant (M/F)

We are looking for our future data analysts and data engineers consultants !

As part of our business development, we are looking for Business Analysts and Engineers.

You will be working within our team of consultants on improving the performance of our Customers' processes. You will organise and conduct meetings with our Clients operating personnel to understand their process as-is situation and imagine with them the viable to-be that will improve their performance. Make sense of complex accounting and administration systems, ERPs, management sophisticate IT systems are your daily work.

You will be working in close contact with our clients in order to meet their needs in accordance with the quality/cost/deadline triangle.

Skills required

Soft skills are fine, but hard skill are necessary to work in a complex work environment!

Hard skills:

- Project management
- Process engineering
- Data Analysis and reporting

IT Development processes:

- Classic waterfall with quality gates
- Agile methodology

Plus:

- OLAP technology
- Hypercubes

Profile

- You have a general engineering or business management school
- You are comfortable with analytics
- You can withstand pressure and stress
- You are used to precision and attention to detail
- You are really willing to coordinate a team including Customers' personnel
- You are fluent in written and verbal reporting French and English (German would be a plus)

Contract

- Internship
- Alternance

- Permanent
- Slashers are welcome

Recruitment Process

- A CV or well done Linked In profile
- A motivation letter to showcase of your communication skills is a plus
- If your profile interests us, an online interview will be organised (approximately lasting 30 minutes).

- Then, you'll get invited to a Tech and Ambition interview on site or online if necessary, that lasts about 1 hour.

- Finally, you will come perform a Fire Test with us where you will have to solve a real life challenge and show your agility facing problems! Don't worry, the name is scary, but if you're confident, everything will be okay!

About Vesper Aerospace
